Comment on the school's community, locality and relevant history

Counter Terrorism Briefing Jan 2026. Update

During the most recent Counter Terrorism briefing, it was reported that there were 48 Prevent referrals in Quarter 2 of 2025/26, representing a reduction of eight referrals compared to the previous quarter and seven fewer than Quarter 1. Monthly figures showed 11 referrals in October, a peak of 24 in November, and 13 in December. Leicester City accounted for the highest number of referrals (22), followed by Charnwood (9), Rutland (4), North West Leicestershire (4), Blaby (3), Melton (2), Hinckley & Bosworth (2), and one referral each from Harborough and Oadby & Wigston. Right-wing ideology was identified in referrals from Charnwood (5), Rutland (1), North West Leicestershire (1), Hinckley & Bosworth (1) and Blaby (1), while Islamist views were noted in referrals from Leicester City, North West Leicestershire and Blaby; however, many referrals had no identified ideology. The majority of referrals related to males (33), with 10 female referrals and 10 where gender was not recorded. Age data showed the highest number of referrals among those aged 11–15 (17) and 16–17 (9), with smaller numbers across other age groups. Education settings were the primary source of referrals (17), followed by Police and Health (7 each), Local Government (4), Emergency Services (2), and single referrals from HM Prison and Probation, online sources, the Military, and a registered charity.

Islamist extremism and extreme right-wing ideology continue to represent the two most significant terrorist threats within Leicestershire. Support for Palestine Action remains evident, with Leicestershire residents continuing to participate in national protest activity. Despite sustained national and regional attention on the UK immigration situation, Leicestershire has not experienced the same level of protest activity at immigration hotels during Quarter 2. During the reporting period, 13 individuals were arrested under Terrorism Act (TACT) legislation, with one resulting conviction.
